

Dock Seal & Dock Shelter Recovers

Don't replace your dock seals, improve it!
Universal seal/shelters recover kits, for
virtually all dock seal/shelter brands.

Dock Seal/Shelter Investment Solution

Recovers save money vs the total cost of freight, disposal and the cost of "new" seals/shelters. For dock seals if the foam is in good shape and the cover fabric(s) are torn or worn out a recover could save as much as 40% over the total cost of replacement.

For dock shelters if the frame and fiberglass panels are in reasonable good shape, just replace the curtains, and save. Chalfant's recovers are available in a wide range of cover fabrics and optional guardian pleat protection of 4", 8" and 16". Recovers are easy to install for increased product longevity, productivity, employee safety and lower overall cost than replacement.

Standard Features:

- For all brands of dock seals and dock shelters.
- Easy and fast installation of universal recovers.
- Available in a wide variety of fabric's and colors.
- Available with a wide variety of options.
- Lower dock downtime vs. total replacement

Chalfant has pioneered, developed and provided the industry with quality loading dock equipment since 1940. Safe, affordable, reliable dock equipment, to meet your application needs.

Contact your Chalfant representative today, for a quote on our universal seal/shelter recover kits, just provide the dimensions, fabric type and selected options.
